Clark Fork Coalition, National Wildlife Federation and Defenders of Wildlife collaboratively launched the Beaver Conflict Resolution Pilot Project in 2019 with a three-fold goal: 1) to build greater tolerance for beavers on our landscape, 2) to reduce beaver-related problems like flooding and tree-felling via nonlethal methods, and 3) to educate our partners about these methods.

Our objectives for accomplishing these goals are:
• Build a cost-share and technical assistance pilot program for landowners who experience beaver-related problems.
• Train local partners how to assess beaver-related problems and address them with nonlethal solutions.
• Develop a strong working relationship with Montana Fish Wildlife and Parks as a basis for a broader, longer-term beaver conflict resolution program linked to larger scale beaver restoration goals.

Here’s a quick summary testifying to two successful seasons, the summers of 2019 and 2020.

**NOTABLE NUMBERS**

- 13 on-the-ground projects completed
- 4 hands-on workshops delivered
- 393 people reached through workshops and webinars

**INSTALLATIONS ON THE GROUND**

Types of projects installed:
• Pond levelers to minimize flooding caused by beaver activities;
• Tree fencing to prevent beaver browsing;
• Exclusion fences to protect culverts and other pinch points where beavers like to build their dams.

Completed Projects by Type

At right, a fenced tree, Washoe Park, Anaconda. Top right, an exclusion fence, Big Hole watershed. Bottom right, a pond leveler, Lost Creek State Park.
PARTNERS ENLISTED

• Game wardens
• Fish biologists
• State park managers
• County road departments
• State road department
• Watershed groups
• Private landowners
• Land trusts

TESTIMONIALS

“Working with the beaver mitigation team gave us the invaluable experience and knowledge to continue to build these important beaver conflict reduction projects into our wildlife programs in the future!”

—Ben LaPorte
Big Hole Watershed Committee

“The Beaver Conflict Resolution project provided an innovative, and non-lethal, alternative to an age-old problem of beavers plugging road culverts. As manager, I like to see beaver on the landscape, but I also have to look out for the park’s infrastructure. I think the beaver culvert fence served both needs admirably.”

—Mike Kustudia
Montana Fish, Wildlife and Parks
